

BSK21 PHOSPHATIDYLCHOLINE BODY SKIN CARE LIPOLYTIC SOLUTION

WHAT IS IT?

Phosphatidylcholine solution.

Naturally present in cell membranes, this phospholipid dissolves fat stored in adipocytes. It emulsifies fat, allowing it to be absorbed and transported. This makes it the ideal solution for eliminating localized fat deposits.

It acts on localized fat, promoting its elimination and reducing the visible symptoms of cellulite.

HOW TO USE

Topical use for body. Apply to the area to be treated, massaging gently until completely absorbed. Suitable for use in application techniques.

PRESENTATION

10 Amp. x 5ml / 0.1755 Fl. Oz.

USE

Corporal

INGREDIENTS

· Phosphatidylcholine

ACTION

· Drainage
