

BSK11 AMPELOSLIM

REDUCING LIPOLYTIC SOLUTION

WHAT IT IS?

AMPELOSLIM is an effective solution for fat reduction and body remodelling. It contains Ampelopsina, or Dihydromyricetin, a natural flavonoid extracted from *Myrica L. Cerifera*. AMPELOSLIM reduces and modulates the amount of fat in the adipose tissue, by reducing lipogenesis and adipogenesis, as well as promoting lipolysis.

Triple Action Body Remodelling, Acting on adipocyte metabolism

1. *Inhibits adipogenesis* > Reduces the number of fat cells
2. *Increases lipolysis* > Promotes metabolism of accumulated fat
3. *Inhibits lipogenesis* > Prevents formation of new fat accumulation

AMPELOSLIM is a treatment solution for cellulite and localised adiposity reduction. AMPELOSLIM helps to reduce and modulate the amount of fat in the adipose tissue, by helping to reduce lipogenesis and adipogenesis, as well as promoting lipolysis. A professional use, sterile solution.
