

BSK12 REDUPRO

REDUCING CELLULITE SOLUTION

WHAT IS IT?

REDUPRO is a professional use, sterile solution for the treatment of compact or fibrous cellulite. Although we want to lessen the facial lines, facial expression is not something we really want to lose completely.

This solution may help to accelerate lipolysis and biostimulation of collagen and elastin fibres, encouraging micro-circulation.

Combining proven lipolytic and skin firming ingredients including:
L-Carnitine transports long-chain acyl groups from fatty acids into the mitochondrial matrix, so they can be broken down through β -oxidation to acetyl CoA to obtain usable energy via the citric acid cycle. Organic Silanol stimulates fibroblasts and promotes the biosynthesis of collagen and elastin.

Centella Asiatica (Gotu Kola) has a wide range of benefits including anti-oxidant, stimulating lipolysis, enhancing lymphatic drainage, protecting capillaries and blood vessels, enhancing the production of collagen with a skin firming action.

Caffeine causes an increase in the intracellular concentration of the cyclic AMP (acid adenosín-5- monophosphoric cyclic) and has immediate consequences in the lipid metabolism of adipose tissue and thus an increase in the levels of the cyclic AMP.

PRESENTATION

Vials 10ml / 0.35 Fl. Oz. | 1 Box of 5 units

USE

Cellulite reduction, flaccid skin.

INGREDIENTS

L- Carnitine, Organic Silanol, Asiatic Spark extract.

BENEFITS

Helps reduce appearance of cellulite, accelerating lipid metabolism, restructuring and detoxifying the tissue. Improves skin tone and texture
