

BSK16 CAFFEINE 10% BIO-REDUCING SOLUTION

WHAT IT IS?

Sterile solution of caffeine, indicated for the treatment of visible symptoms of localized cellulitis.

It acts on oxidation of fatty acids indirectly, after the elimination of excess glucose, with a pronounced lipolytic effect on cellulite and localized fat deposits.

CAFFEINE is commonly used in treatments for all forms of cellulite and localised adiposity reduction. It is a professional use, sterile, cosmeceutical solution.

Caffeine stimulates and intervenes in the lipolytic process by inhibiting the effect of phosphodiesterase and increasing CAMP. Commonly used in treatments for all forms of cellulite and localised adiposity reduction.

HOW TO USE

Body product. Apply on the area to be treated, giving a light massage until product complete absorption.

PRESENTATION

10 Amp. x 5ml / 0.175 Fl. Oz.

USE

Body product

INGREDIENTS

- Caffeine
