

BSK3 BOTOPEPTIDES

SMOOTHING WRINKLES SOLUTION

WHAT IS IT?

BSK3 BOTULOPEPTIDES is a professional treatment solution that targets crow's feet and deep wrinkles caused by muscular contraction. These tend to perpetuate and worsen as our facial expressions are natural and ongoing.

Although we want to lessen the facial lines, facial expression is not something we really want to lose completely.

BOTULOPEPTIDE is a sterile solution including Snap8 and Leuphasyl.

Snap8 competes with natural proteins to be positioned in the SNARE Complex, which is destabilised. As a result, it reduces neuronal excitability and muscle contraction. Leuphasyl, a new pentapeptide, mimics the natural path of enkephalins and also acts on expression wrinkle formation.

It is a professional use, sterile solution.

PRESENTATION

Vials 10ml / 0.35 Fl. Oz. | 1 Box of 5 units

USE

Expression lines and wrinkles, caused by facial muscle contractions.

INGREDIENTS

Snap8, Leuphasyl

BENEFITS

Smooths the skin and reduces fine lines and wrinkles caused by facial muscle contractions but gives a very natural looking result.
