

# BSK80 PEEL PRO COCKTAIL HARD

## BSK80 PEEL PRO COCKTAIL HARD BENEFITS?

- Diminish the thickness of the stratum corneum by reducing corneocyte cohesion.
- Decrease fine lines and wrinkles.
- Improve skin elasticity and collagen support structure.
- Remove dead cells from the upper skin and lessen superficial pigment changes age and sun spots...
- Smooth and soften skin.
- Unclog pores clear acné.
- Reduce pore size and normalize oil production.
- Increase the skin own ability to hold moisture.
- Promote rapid cellular turn over.

## COMPOSITION

- Lactic Acid-20 %
- Glycolic Acid-20 %
- Citric Acid-4 %
- Malic Acid-10 %
- Salicylic Acid-0,1 %

Ph: 1,2 -2,2

# BSK81 PEEL PRO COCKTAIL MEDIUM

## BSK81 PEEL PRO COCKTAIL MEDIUM BENEFITS?

- Diminish the thickness of the stratum corneum by reducing corneocyte cohesion.
- Decrease fine lines and wrinkles.
- Improve skin elasticity and collagen support structure.
- Remove dead cells from the upper skin and lessen superficial pigment changes age and sun spots...
- Smooth and soften skin.
- Unclog pores clear acné.
- Reduce pore size and normalize oil production.
- Increase the skin own ability to hold moisture.
- Promote rapid cellular turn over.

## COMPOSITION

- Lactic Acid-0,9 %
- Glycolic Acid-20 %
- Citric Acid-1,7 %
- Malic Acid-0,8 %
- Gluconic Acid-0,5%
- Ascorbic Acid-0,5
- Tartaric Acid-0,05%
- Salicylic Acid-0,1 %

Ph: 2,5 -3,5

# BSK82 PEEL PRO COCKTAIL SOFT

## BSK82 PEEL PRO COCKTAIL SOFT BENEFITS?

- Diminish the thickness of the stratum corneum by reducing corneocyte cohesion.
- Decrease fine lines and wrinkles.
- Improve skin elasticity and collagen support structure.
- Remove dead cells from the upper skin and lessen superficial pigment changes age and sun spots...
- Smooth and soften skin.
- Unclog pores clear acné.
- Reduce pore size and normalize oil production.
- Increase the skin own ability to hold moisture.
- Promote rapid cellular turn over.

## COMPOSITION

- Lactic Acid-0,9 %
- Glycolic Acid-20 %
- Citric Acid-1,7 %
- Malic Acid-0,8 %
- Gluconic Acid-0,5%
- Ascorbic Acid-0,5
- Tartaric Acid-0,05%
- Salicylic Acid-0,1 %

Ph: 3,5 -4,5

# BSK87 PEEL PRO BRIGHTENING PEEL

## BSK87 PEEL PRO BRIGHTENING PEEL BENEFITS?

- Ferulic acid has garnered a lot of interest due to its ability to fight free radicals while also boosting the effectiveness of other antioxidants, such as vitamins A, C, and E.
- Improve skin elasticity and collagen support structure
- Remove dead cells from the upper skin and lessen superficial pigment changes age and sun spots...
- Increase the skin own ability to hold moisture
- Promote rapid cellular turn over

## COMPOSITION

- Ferrulic Acid-8,0 %
- Citric Acid-5,0 %
- Malic Acid-5,0 %
- Lactic Acid-4,0 %

Ph: 2,0 – 3,0

# BSK88 PEEL PRO NEUTRALIZING LOTION

## BSK88 PEEL PRO NEUTRALIZING LOTION

BSK88 PEELPRO NEUTRALIZING LOTION is a neutralizing Solution with Aloe Vera that increases the pH of the skin to counteract the aggressive effects of acids after the application of a peel. It is recommended to apply to the skin to neutralize residual acids after removing the product as indicated in the PEELPRO products usage sheet.

Apply with clean gauze or cotton.

### CHEEMICAL SKIN PEEL

## COMPOSITION

- Aqua
- Sodium Bicarbonate
- Glycerin
- Aloe Barbadensis Leaf Juice
- Phenoxyethanol
- Ethylhexylglycerin
- Potassium Sorbate
- Sodium Benzoate

# BSK200 MELAN PRO DEPIGMENTING PROFESSIONAL KIT

## WHAT IS IT?

Depigmenting treatment that combines a shock treatment, through a mask BSK105 rich in assets, with daily maintenance using the BSK104 cream that completes the treatment making it effective.

The MelanPro mask BSK105 works effectively against existing melanin, breaks down and removes skin blemishes while inhibiting the melanin formation process. This prevents recurrence and the appearance of new spots.

MelanPro cream BSK104 completes the treatment and increases the depigmentation results of the MelanPro mask BSK105, keeping new melanin production under control and preventing the reappearance of treated spots, as well as the appearance of new ones.

For an effective treatment it is important to apply on clean skin to prevent the active ingredients from acting, oxidizing the fat that we have not removed, so the kit includes a vial with an effective cleaning solution that complements a routine cleaning with soap or tonic.

## PRODUCTS OF KIT

- BSK104 MelanPro Cream: 2 units x 30gr
- BSK105 MelanPro Mask: 1 unit x 30gr
- BSK106 MelanPro Solution: 1 unit x 10ml

# BSK200 MELAN PRO DEPIGMENTING PROFESSIONAL KIT

## INGREDIENTS

This kit provides three complementary treatment products between them and formulated with three actions:

- Depigmentation of localized spots, reducing the diameter and intensity of pigmentation.
- Acid exfoliation to facilitate the elimination of superficial dead cells and promote the reduction of stains.
- Hydration and lighting of the skin.

Both BSK 104 and BSK 105 are products formulated with new generation, controlled release liposomes, which provide properties to the product such as greater effectiveness since it increases up to 10 times the dermal release of the active ingredient and the protection of the skin since they regenerate the barrier. natural protector due to its composition.

## LIPOSOMATED VITAMIN C

L-Ascorbic Acid in its stabilized form (Sodium Ascorbyl Phosphate) encapsulated in new generation liposomes that allow smart release, increasing its effectiveness 10 times compared to other products with the same concentration of non-liposomed active.

## LIPOSOMATED ARBUTINE

Arbutin is a depigmenting active with high efficacy due to its antioxidant power, its action is increased by its ability to inhibit tyrosinase.

# BSK200 MELAN PRO DEPIGMENTING PROFESSIONAL KIT

## INGREDIENTS

### LIPOSOMATED ARBUTINE

#### EFFICACY

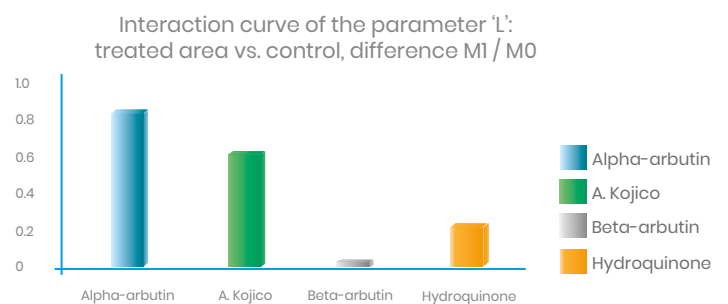

#### IN VITRO THYROSINASE INHIBITION

ALPHA-ARBUTIN exhibits impressive inhibition of tyrosinase in-vitro when compared to beta-Arbutin in human cell lysates.

Beta-Arbutin: IC50 = 9.0 mMol;  
ALPHA-ARBUTIN: IC50= 1.0 mMol;

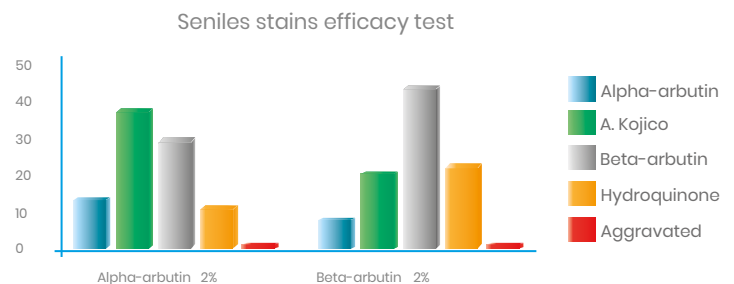

#### IN VIVO STUDY OF SKIN RINSING IN THE SHORT TERM

A skin lightening study in 80 women of Chinese origin showed that an emulsion with 1% ALPHA-ARBUTIN achieved faster and more pronounced skin lightening after 1 month of treatment compared to other individual components commonly used in 1% dose.

#### IN VIVO EFFICACY STUDY ON SENILE STAINS

In a 3-month study of 26 volunteers, a cream formulation with 2% ALPHA-ARBUTIN minimizes senile spots more effectively than Beta-Arbutin. Figure 2 shows the percentages of satisfaction in relation to the reduction of senile spots.

### SOPHORA FLAVESCENS ROOT EXTRACT

To complete the depigmenting formulation we have added a plant extract that complements this action. Sophora Flavescens Root Extract is an extract of natural origin that works at three levels to prevent the appearance of stains and with a prevention factor.

- At the superficial application level: antioxidant and anti-inflammatory power, inhibiting interleukin 6 and 8.
- At the Epidermis level: it favors the natural exfoliation of the skin, inhibits Tyrosinase activity by 80% and inhibits melanogenesis by 58%.
- At the Dermis level: it inhibits the enzymatic activity of a group of enzymes known as MMP (metalloproteinases whose main activity is to break down collagen), thus contributing to the maintenance of the extracellular structure of the dermis, and also has an anti-glycation activity, which favors correct cell division, that is, cell renewal.

# BSK200 MELAN PRO DEPIGMENTING PROFESSIONAL KIT

## INGREDIENTS

---

### COMPLEX FROM A COMBINATION OF ACIDS

---

COMPLEX FORMULATED FROM A COMBINATION OF ACIDS (KÓJICO ACID, PHYTIC ACID, ACLAIC ACID, SALICILIC ACID): this combination of acid within the formulation forms a chemical peeling system that helps to remove and detach dead cells from the outer layer external of the skin.

### NIACINAMIDE

---

Niacinamide helps to unify skin tone, eliminating the yellowish tone that appears with age. This process seems to be due to glycation, that is, the spontaneous oxidative reaction that occurs between sugars and proteins, and that results in yellowish products that accumulate in the skin. Nicotinamide, being a precursor of the antioxidant enzymes NADH and NADPH, is an effective topical active to unify skin tone.

In vivo studies also show that niacinamide significantly improves other problems associated with aging, such as skin texture and the appearance of small wrinkles.

### ALOE VERA EXTRACT

---

Added ingredient to help calm skin, soften and give a healthier appearance after application.

### JOJOBA OIL

---

Jojoba oil provides elasticity to the formula, leaving the skin visibly more nourished.

# BSK200 MELAN PRO DEPIGMENTING PROFESSIONAL KIT

## APPLICATION PROTOCOLS

1. Thoroughly cleanse the skin using BSK106 MELANPRO SOLUTION - 10 ml.
2. Apply a thick coat of BSK105 MELANPRO MASK and maintain the application time. Depending on the skin type, the professional will estimate the time (between 8 and 12 hours). Avoid the area around the eyes.
3. Once the exposure time estimated by the professional has passed, remove the mask and apply if necessary the BSK107 MelanPro Neutral Gel to help calm the skin.
4. After 24 hours of exposure, apply BSK104 MELANPRO CREAM twice a day as indicated in the protocol.

It is important to protect the skin with high sun protection. Image that comes in the kit.

### MELAN PRO METHOD PROTOCOL

#### Phase I: intensive depigmentation

Description: Deep cleanse with degreasing solution then apply the BSK105 MelanPro Mask with highly concentrated active ingredients for a powerful depigmenting effect. The product must be applied by a professional who will decide on the application time for each case. After the recommended application time, the patient must remove the product at home to complete the first phase.

8 - 12 hours

**STEP 1:** preparation with BSK106 MelanPro Solution

**Instructions for use:** apply to clean, dry skin with a gauze.

**STEP 2:** intensive treatment with BSK105 MelanPro Mask

	dry skin	normal/ combination skin	oily skin
Phototypes I and II	8 hours	8 hours	10 hours
Phototypes III and IV	8 hours	10 hours	12 hours
Phototypes V and VI	10 hours	12 hours	12 hours

**Instructions for use:** apply the 10g of MelanPro Mask and leave it as instructed by the professional for between 8-12 hours according to the guidelines in the table above.

**STEP 3:** facial mask removal

**Instructions for use:** rinse carefully with plenty of luke-warm water and repeat as required, avoiding direct contact with the eyes.

In case of erythema, tightness or irritation, we recommend you apply a layer of BSK107 MelanPro Neutral Gel and allow to work for 10 - 15 minutes.

# BSK200 MELAN PRO DEPIGMENTING PROFESSIONAL KIT

## APPLICATION PROTOCOLS

### Phase II: continuous depigmentation

**1<sup>st</sup> Month**

After 48 hours of the BSK105 MelanPro Mask removal, continue with daily depigmentation to ensure the corrective action of the method and to control melanin production inside the melanocyte.

**APPLICATION PROTOCOL 1<sup>st</sup> month after the salon treatment:**

BSK104 MelanPro Cream      BSK107 MelanPro Neutral Gel      Moisturizing sun protection SPF50

Instructions for use: apply MelanPro treatment 3 times a day (morning, midday and night), following with BSK107 MelanPro Neutral Gel and moisturising sun protection SPF 50 after daytime applications.

In case of extreme sensitivity during this phase, consider spacing MelanPro treatment application, without completely withdrawing the treatment.

### Phase III: pigmentation regulation

**2<sup>nd</sup> to 3<sup>rd</sup> Month**

At this point, it is important to treat the root cause, controlling melanin production through constant melanocyte control. This controls both intra and intercellular melanin availability and prevents repigmentation.

**APPLICATION PROTOCOL 2<sup>nd</sup> to 3<sup>rd</sup> month:**

BSK104 MelanPro Cream      BSK107 MelanPro Neutral Gel      Moisturizing sun protection SPF50

Instructions for use: apply MelanPro treatment morning and night, followed by BSK107 MelanPro Neutral Gel and moisturising sun protection SPF 50 during the day. In case of continuous sun exposure, reapply UV protection at midday.

### Phase IV: reappearance control

**4<sup>th</sup> to 7<sup>th</sup> Month**

There is a constant risk of developing dark spots. During this control phase, the treatment prevents the reappearance of treated dark spots and the formation of new ones, for longerlasting success.

Once the method is complete, we strongly recommend continuous use of sun protection as a permanent cosmetic treatment.

**APPLICATION PROTOCOL 4<sup>th</sup> to 7<sup>th</sup> month:**

BSK104 MelanPro Cream      BSK107 MelanPro Neutral Gel      Moisturizing sun protection SPF50

Instructions for use: apply Melan Pro treatment followed by BSK107 MelanPro Neutral Gel at night. During the day, apply moisturising sun protection SPF 50, and reapply in case of continuous sun exposure.

# BSK200 MELAN PRO DEPIGMENTING PROFESSIONAL KIT

## COMPLEMENTARY TREATMENTS

If the professional considers it appropriate, the treatment can be supplemented with BSK14 - TRANEXPRO and with a previous chemical peel:

- BSK 80 - PEELPRO COCKTAIL HARD
- BSK 81 - PEELPRO COCKTAIL MEDIUM
- BSK 82 - PEELPRO COCKTAIL SOFT
- BSK 87 - PEELPRO BRIGHTENING

As considered by the professional.

After the treatment it can be complemented with a maintenance treatment using the BSK76 TRANEXPRO Serum and BSK70 TRANEXPRO Depigmentation Cream during the day, and the BSK104 MELANPRO CREAM at night, in this way it will be possible to continue to equalize the tone and prevent the new appearance of spots.
