

BSK9 HAIRPRO

HAIR REVITALIZING SOLUTION

WHAT IS IT?

BSK9 HAIRCARE solution nourishes and stimulates hair follicles for healthy hair growth, and may help protect against androgenic alopecia, androgenic areata and telogen effluvium. It is a professional use, sterile, cosmeceutical solution.

Ginkgo Biloba stimulates microcirculation which helps increase the supply of nutrients to the scalp, strengthening hair follicles and stimulating new hair growth. It also has antibacterial properties which promote a healthy scalp.

Panthenol coats the hair and seals its surface, lubricating and giving a shiny appearance. Organic Silanol functions as a cross-linking agent, providing strength, flexibility and resilience. It acts as a catalyst for many reactions whilst stabilizes and maintains the architecture of skin tissues, stimulating fibroblasts and promoting the biosynthesis of collagen fibres and elastin.

Cegaba is an amino-acid which stimulates cell growth and cell proliferation. Through a series of non-hormonal mechanisms, it prolongs and activates the hair growth phase, strengthening hair follicles, making them more resistant and able to produce stronger and thicker hair.

Vit-Complex 1 contains numerous vitamins including biotin, niacinamide and riboflavin, which have a soothing and antioxidant effect and accelerate hair growth.

PRESENTATION

Vials 10ml / 0.35 Fl. Oz.

USE

Androgenic alopecia, androgenic areata, telogen effluvium.

INGREDIENTS
