

BSK200 MELAN PRO KIT

DESCRIPTION

BSK200 is a treatment that combines a shock treatment, through a mask rich in BSK105 active ingredients, with daily maintenance using the BSK104 cream that completes the treatment making it effective. Contains a previous peeling and neutralizing wipes to prepare the skin before treatment.

This depigmenting method completely eliminates the most severe and resistant stains with maximum efficiency and safety. It has a proven effectiveness that gives it a unique and dual action for a short and long-term results.

Reduces unwanted pigmentation (including melasma, sun spots, age spots, post-inflammatory hyperpigmentation, liver spots, and freckles), smoothes skin, is suitable for all skin colors, is fast acting, and has a proven effective process.

PRECAUTIONES

Store between 5°C and 25°C.
Keep out of reach of children.
Avoid contact with the eyes and mucous membranes.
Discontinue use in case of allergy, sensitivity or hypersensitivity.

PROFESSIONAL TREATMENT

- Clean the skin using BSK products according to the professional's instructions:
 - BSK90 for oily or combination and acne-prone skins.
 - BSK91 for dry, more damaged or mature skins.
- Tone the skin with BSK92, a toner with AHA's that produces a gentle peeling by preparing the skin.
- Next, apply **BSK84** Peelpro Inglow, a preliminary peeling to prepare the skin for the active ingredients.
- Remove the previous peeling and neutralize with **BSK88** PeelPro Neutralizing Wipes.
 - Neutralizing wipe with Aloe Vera that increases the pH of the skin to counteract the aggressive effects of acids after the application of a peeling.
 - It is recommended to apply on the skin to neutralize the residual acids after removing the product as indicated in the peeling products use sheet.
- Next, apply **BSK105** MelanPro Mask.
 - Product with highly concentrated active ingredients for a powerful depigmenting effect.
 - Must be applied by a professional who will decide the application time for each case.
- Removing facial mask at home.
 - Rinse thoroughly with plenty of warm water and repeat as needed.
- In case of erythema, tightness or irritation, it is recommended to apply a layer of BSK93 Post-Meso Cream and leave it on for 10 to 15 minutes.
- After 48 hours of removal of BSK105 MelanPro Mask, continue with daily depigmentation to ensure the corrective action of the method and control melanin production inside the melanocyte.
- Apply **BSK104** MelanPro Cream.
