- Ácido Salicílico-5%
- Citric Acid–5,0 %
- Malic Acid–5,0 %
- Lactic Acid–4,0 %

Ph: 2,0 – 3,0

BSK88

PEELPRO NEUTRALIZING LOTION

- It is a neutralizing solution with Aloe Vera that increases the pH of the skin to counteract the aggressive effects of acids after the application of a peeling.
- It is recommended to apply on the skin to neutralize residual acids after removing the product.
- Apply with clean gauze or absorbent cotton.

BSK800

PEELING KIT

- To treat all skin types.
- To correct skin discoloration associated with alterations in melanin pigmentation.
- It produces a renewal of the epidermis, eliminating the superficial middle layers, helps the regeneration of new tissues and the disappearance of pigmentary discolorations, actinic alterations.
- The treatment can be used in all patients with hyperpigmentation, melasma or other skin color changes, as well as in acne-prone skin, to reduce seborrhea and treat acne.
- The treatment to follow depends on the desired purpose for each skin type, use BSK87 for a shiny finish or BSK81 for acne-prone skin.
